

Initial Table and Board Diagram – 16 Table Web Mitchell
12 rounds, 24 boards

A web movement for an even number of tables requires two sets of boards.
 The pair movement is completely standard - EW pairs move up one table each round.
 There is a skip move at the halfway point - after 6 rounds.
 Boards are divided into two sections, each with their own set of boards - Tables 1-8 and Tables 9-16.
 Boards move down one table each round, and sit out on a relay table after they've been played at the lowest numbered table in the section.
 Note that NS pairs in the higher numbered section will play boardsets in reverse order - eg they play boards 5-6 after 7-8.
